PROJECTS

Portfolio Website (08/2020 - 09/2020)

- This is my personal portfolio website. which I have created with the help of html css and javascript. It is mobile responsive website, it has many pages like home, about, contact and services. Inside the about page my skills, education, project internship and achievement has been Mention. I have used google sheet to collect the data of enquiry form.data.

Grocery Website (07/2022 - 09/2022)

- This is a grocery website. Which is made with the help of HTML CSS and JavaScript, this website is fully responsive. inside it is the item related to food, the price of the food. map has also been used in this website. And product reviews have also been added to grocery website.
- <https://vaibhav30067.github.io/vaibhavgrocery.com/>

CV Screener Application (08/2021 - 12/2021)

- It is cv screener website which I have created for the post of Software Engineer. the special thing is, you can see the name of the candidate, his age and where he lives and which programming languages he knows. If you click on the next button, then the information of other candidates will start coming.
- <https://vaibhav30067.github.io/CV-screener/>

Text Converter Application (06/2022 - 07/2022)

- I have created the text converter app with the help of html and react. In text converter application, you can also see the summary of your word. the word you have entered. you can also count how many words and characters are in your text. The special thing about this application is that it will also tell how long it will take to read the word.
